II. Details of tested sample

Sample description / Color	PVC Coating Material / White
Area density	About 869 g/m²
Products configuration	Single layer
Size of sample *	1200 mm×610 mm

* With the length parallel to the lengthwise direction of the material

III. Cleaning and Conditioning
Prior to testing, the sample was conditioned for 2 hours at 105℃±3℃.
Cleaning procedure: None

IV. Test results

Specimen No	Char length (mm)	After flame time (s)	Burning time of residues or drops (s)
1	290	0	0
2	282	0	0
3	314	0	0
4	280	0	0

Criteria for test method 2 (folded test) (Chapter 15):
1. When any specimen continues flaming for more than 2 seconds after the test flame is removed from contact with the specimen, the material shall be recorded as having failed the test.
2. When the length of char of any individual folded specimen exceeds 1050 mm, the material shall be recorded as having failed the test
3. When at any time during or after the application of the test flame any portions of residues of the material being tested break or drip from the specimen and fall to the floor of the test apparatus and continue burning for more than 2 seconds after reaching the floor of the test apparatus, the material shall be recorded as having failed the test
4. In the event that only one of the four folded specimens does not meet the criteria of 1 above, two new specimens cut in the same direction as the one that failed shall be tested, if both of the new specimens meet all of the criteria, the material shall be recorded as having passed this test.
